

When it comes to computer competency, Customizer helps you make the grade.

In today's technology-focused world, you need to ensure that your students, educators and staff have the computer skills they need to be successful. **Customizer** Courseware from SVI is an affordable, effective way to do just that.

Through SVI's **Computer Competency for Our Schools** program, your district can gain access to the same computer courses that corporate customers purchase, but at a special "school-friendly" price. In fact, with **Customizer**, you can train as many teachers, students or staff as necessary for a full year for one low flat fee. So whether you're training students for the workforce, developing your staff, designing curriculum or meeting state competency requirements, **Customizer** goes to the head of the class.

Professional Instruction for Professional Success.

With the same course library used by major corporations, Customizer prepares your students, teachers and staff with the skills they need to succeed

Unlimited Training for One Low Price.

Whether it's vocational preparation or staff development, you can train as many students, teachers and staff as you like for a full year – all for one low price.

Complete. Customizable.

Choose from a library of nearly 200 off-the-shelf courses – or customize them to meet your district's specific needs.

As Easy to Maintain as It Is to Use.

Customizer can be installed quickly from the Web or CD, and it's accessible from any PC. Plus, free updates are downloadable from the Web.

Practical Instruction. Practically Foolproof.

With both instructor-led and self-study courses, as well as instructor guides, presentations and user manuals, Customizer includes everything needed to create successful classes and training programs.

Proven Effective.

Customizer has helped hundreds of schools nationwide to meet computer competency requirements.
